

Empathy Map

Date	02 July 2026
Team ID	
Project Name	Darshan Ease – Temple Darshan Ticket Booking System
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • “I don't want to stand in a long queue just to get a darshan ticket.” • “I wish I could check slot availability before travelling.” • “I need my ticket handy on my phone, not a printed slip.”	THINKS • Will I get a slot on the day I want to visit? • Is this booking website secure with my details? • It would help to see my past bookings in one place.
Devotee (End User booking darshan)	
DOES • Searches online for temple timings and availability. • Registers and logs in to book a darshan slot. • Shares the e-ticket with family members travelling together.	FEELS • Anxious about not finding a confirmed slot in time. • Relieved once the booking is confirmed instantly. • Confident returning to the app for future visits.
