

Problem-Solution Fit

Date	02 July 2026
Team ID	
Project Name	Darshan Ease – Temple Darshan Ticket Booking System
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience.

1. CUSTOMER SEGMENT(S) [CS] Devotees and pilgrims planning temple visits. Working professionals and families booking in advance. Elderly devotees relying on family members to book on their behalf. Out-of-town / NRI visitors planning trips around darshan dates.	6. CUSTOMER LIMITATIONS <i>EG. BUDGET, DEVICES [CL]</i> Limited smartphone or internet access for some elderly devotees. Low bandwidth / connectivity in rural or temple-town areas. Limited budget for premium or VIP darshan slots. Unfamiliarity with online booking systems.	5. AVAILABLE SOLUTIONS <i>PROS & CONS [AS]</i> Offline counter booking – direct, but long queues and waiting. Phone / helpline booking – no travel needed, but often unreliable with no confirmation. Existing temple websites – online, but outdated, not mobile-friendly, and lack real-time slot data.
2. PROBLEMS / PAINS <i>+ ITS FREQUENCY [PR]</i> Long waiting queues at temple counters – every visit, worse during festivals. Uncertainty about slot availability before travelling – frequent, especially on weekends. No digital record of booking – every offline booking.	9. PROBLEM ROOT / CAUSE [RC] No centralized digital platform that integrates temple information, live slot availability, and secure online booking in one place, forcing devotees to depend on manual, offline processes.	7. BEHAVIOR <i>+ ITS INTENSITY [BE]</i> Devotees frequently call temple helplines or ask relatives/friends who have already visited – high intensity during festivals and auspicious days, lower during regular days.
3. TRIGGERS TO ACT [TR] An upcoming festival, auspicious day, or planned family trip to a temple. Need to confirm a slot before starting travel to avoid wasting the trip. 4. EMOTIONS <i>BEFORE / AFTER [EM]</i> Before: anxious and uncertain about whether the trip will result in a successful darshan.	10. YOUR SOLUTION [SL] Darshan Ease is a secure web application where users can register, log in, browse available darshan tickets (products), place orders online, view their booking history, and manage their profile through a simple interface.	8. CHANNELS OF BEHAVIOR [CH] <u>ONLINE</u> Temple / trust websites and social media pages. Search engines when planning a trip. <u>OFFLINE</u> Temple ticket counters. Helpline phone calls. Word of mouth from family and friends.

After (with Darshan Ease): confident and relieved, with a confirmed slot and digital ticket in hand.
