

Solution Architecture

Date	02 July 2026
Team ID	
Project Name	Darshan Ease – Temple Darshan Ticket Booking System
Maximum Marks	5 Marks

Solution Architecture Diagram:

The diagram below maps Darshan Ease's Presentation, Application, and Data layers to the specific technologies used in the project.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Devotee-facing web app for User interface for registration, login, browsing darshan ticket products, placing orders, and viewing profile., and booking darshan tickets; an admin dashboard for managing temples, slots, and orders.	React.js, React Router, Axios
API Gateway	Single entry point for all client requests; routes incoming HTTP requests to the appropriate controllers and applies cross-cutting middleware such as CORS and body parsing.	Express.js, Node.js, CORS, body-parser
Microservices	Modular backend services handling authentication, products, orders, and profile management through Express route/controller modules.– implemented as separate route/controller modules within the Express app.	Node.js, JWT, bcrypt, Mongoose controllers
Database	Stores persistent application data – registered users, stores user information, product details, and order records in MongoDB collections., and booking/order records.	MongoDB, Mongoose
