

Coding & Solution

Date	02 July 2026
Team ID	
Project Name	Darshan Ease – Temple Darshan Ticket Booking System
Maximum Marks	5 Marks

Coding & Solution

This section summarizes the implemented code and overall solution for Darshan Ease, demonstrating working functionality, clean code practices, and alignment with the defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/AmruthaVarshini37/Darshan-Ease
Programming Language(s)	JavaScript (Node.js for backend, React.js for frontend)
Framework(s) Used	React.js, Express.js, Node.js, Mongoose (ODM for MongoDB)
Key Features Implemented	- User registration and login with JWT-based authentication. - Browsing temples / darshan products with details. - Darshan slot selection and online ticket booking. - Order creation and booking history retrieval. - Protected routes via authentication middleware. - Admin-side CRUD operations on products and orders.
Pending / Incomplete Features	- Online payment gateway integration. - Email / SMS booking confirmation notifications. - QR-code based electronic tickets. - Admin analytics dashboard.
Setup / Run Instructions	Frontend: cd client, run npm install, then npm run dev – app runs on http://localhost:5173 Backend: cd server, create a .env file with MONGO_URI and PORT, run npm install, then nodemon index.js – server runs on http://localhost:8000

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Partial
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The application's core booking flow (registration, login, product browsing, order creation, and profile management work successfully from end to end.) runs successfully end-to-end. The main gaps before final submission are adding more inline comments explaining the logic and completing the pending features listed above (payment integration, notifications, QR tickets, and admin analytics).
