

Project Executable Files

Date	02 July 2026
Team ID	
Project Name	Darshan Ease – Temple Darshan Ticket Booking System
Maximum Marks	3 Marks

Project Executable Files

This section documents all executable and deployable files for Darshan Ease, so the evaluator can run or review the solution using the files and instructions below.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA – MongoDB collections created dynamically, no seed files used
5	Environment configuration file (.env.example or similar)	No – only a local .env exists; add a .env.example template
6	Deployed application URL (if hosted)	No – currently runs locally only
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA – web application
8	Dockerfile / Containerization config (if applicable)	NA – not containerized
9	Test files and test results	No – tested manually; no automated test files yet
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Overview of the project's file and folder structure:

/darshan-ease	
/client	- React frontend application
/src	
/components	- Register, Login, Products, Profile, Orders, etc.
/services	- api.js (Axios instance for backend calls)
package.json	
/server	- Node.js / Express backend application
/config	
db.js	- MongoDB connection setup
/models	- Mongoose schemas: User, Product, Order
/routes	- authRoutes.js, productRoutes.js, orderRoutes.js
/controllers	- authController.js, productController.js, orderController.js
/middleware	
authMiddleware.js	- JWT verification for protected routes
index.js	- Express app entry point
.env	- Environment variables (PORT, MONGO_URI)
package.json	

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	<i>Not yet deployed</i>
Login Credentials (Demo)	Email: amrutha@gmail.com Password: *****
Platform / Hosting Provider	Not yet deployed (currently runs locally)
Repository Link	https://github.com/AmruthaVarshini37/Darshan-Ease
Demo Video Link	<i>[Add your demo video link here once recorded]</i>

Step 4: Run Instructions

Step-by-step instructions for the evaluator to run the project locally:

Pre-requisites:

Node.js (v16 or later) and npm installed. A running MongoDB instance (local or MongoDB Atlas).

Step 1: Clone the repository – git clone <repository-url>

Step 2: Set up the backend – cd server, then run npm install

Step 3: Configure environment – create a .env file in /server with MONGO_URI and PORT (e.g. PORT=8000)

Step 4: Start the backend – run nodemon index.js (server runs at http://localhost:8000)

Step 5: Set up the frontend – open a new terminal, cd client, then run npm install

Step 6: Start the frontend – run npm run dev (app runs at http://localhost:5173)

Step 7: Open http://localhost:5173 in the browser to use the application

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	A few order records had No major issues identified after testing.	Under investigation – needs a data cleanup / validation fix in the order controller.
2	No online payment gateway integration yet.	Planned as future scope; bookings are currently confirmed without payment.
3	No automated test suite; testing has been done manually so far.	Add automated tests (e.g. with Jest / Postman collections) before final submission if time allows.
