

Data Flow Diagram

Date	02 July 2026
Team ID	
Project Name	Darshan Ease – Temple Darshan Ticket Booking System
Maximum Marks	2 Marks

Data Flow Diagram

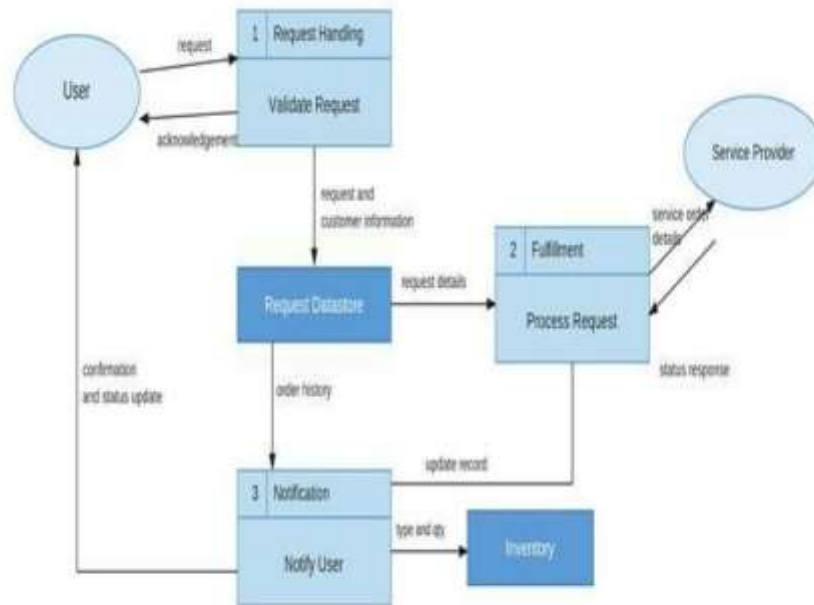

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Devotee, Temple Admin).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Validate User, Process Booking).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Booking Database, Ticket Database).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.

Data Flow Diagram – Darshan Ease

The diagram below shows how data flows between devotees, the temple admin, the core processes, and the data stores in the Darshan Ease system.
